**Chest X-ray quiz**

Compiled by Marea Reading, CNC, St Vincent’s Hospital, Sydney and Australian Catholic University, MacKillop Campus, North Sydney.

**Question**

This is an anterior-posterior (AP) supine chest X-ray of a 44 year old lady following a median sternotomy to replace her aortic valve. It is the first chest X-ray taken on return to the Intensive Care Unit.

The patient has in place

I. endotracheal tube (ETT)
II. central vein catheter (CVC)
III. pulmonary artery catheter (Swan-Ganz)
IV. intragastric tube (IGT)

You are asked to determine the location of these and give an overall comment on this chest X-ray.

For answer and discussion turn to page 67 of this issue.
